## About this event

The History of Northampton in Emotional Objects explores the personal and community attachments to the Town and region through a series of objects selected by the people of Northampton. How do objects attach us to families and places? Why do we feel an attachment to things and what does this tell us about our lives? This free one day exhibition will take place at the Northampton Museum, organised with the University of Northampton, and we will announce the winning three emotional objects at the exhibition and display the shortlisted objects in an exciting VR display over the following week.

Please bring along an object that connects you to Northampton and/or has an emotional meaning to you.

This event is part of the Being Human festival, the UK's national festival of the humanities, taking place 10–19 November 2022. Led by the School of Advanced Study, University of London, with generous support from Research England, in partnership with the Arts and Humanities Research Council and the British Academy. For further information please see [beinghumanfestival.org](http://beinghumanfestival.org).
